

New design possibilities with Lenzing Profilen[®] and Dolan[®]

Two strong Lenzing AG brand names for shade systems are working together on innovation and marketing. That means, 2 sun shade solutions from the same company!

The Dolan[®] brand, a synonym for high quality acrylic fiber, and Lenzing Profilen[®], a high performance fiber for the most demanding sun shade applications are joining forces with regard to innovation and marketing.

The team and your contact partners will remain the same and you will receive first-hand information on both products:

Lenzing Profilen[®]
Thomas Stabauer

Dolan[®]

Alexandra Walz

Phone: +49 (0)9441 99-392

E-mail: a.walz@lenzing.com

Lenzing Profilen[®] is recognized as a world-wide leader in the manufacturing of high performance fibers for sun sails and sun shades with the highest sun protection properties. Products made of Lenzing Profilen[®] benefit from excellent UV light resistance, flame retardant properties as well as dirt- and water repellent characteristics. Contrary to fiber glass fabrics coated with fluoropolymers, Lenzing Profilen[®] fabric is highly flexible and has non-crease properties, thus, offering new design possibilities. Lenzing Profilen[®] can guarantee long-term performance in extreme conditions such as in the Gulf region. Of all the materials that were tested, only Lenzing Profilen[®] fabric was selected for its long-term outstanding properties, Lenzing's reliability and large production capacity.

For 25 years now, Dolan[®] has represented proven quality in the outdoor sector (awnings, sun sails, sun shades etc.). The fiber is produced using a special spin-dyeing process. It is therefore sought-after throughout the world for its weatherproof, light resistant and color-fast properties. This fiber also stands out in terms of its abrasion resistance and its easy-care properties. New innovative applications in the outdoor lifestyle sector are opening up new possibilities for the Dolan[®] fiber.

Lenzing - Leading Fiber Innovation

The long standing quality philosophy of Dolan[®] is ideally complemented by Lenzing Profilen[®]. The first joint cooperation is the use of Lenzing Profilen[®] sewing yarns for Dolan[®] products. Lenzing Profilen[®] sewing yarns are a perfect addition to the spin-dyed acrylic Dolan[®] fibers, according to Alexandra Walz, Marketing Manager. Therefore new innovative solutions can be created for the outdoor sector.

Combined presentation

The combination of high product quality, technical competence and design will be presented to an international audience in Rimini (Italy) at the Tende & Tecnica trade fair, the leading trade fair for architectural design, sunshades and the textile world. The Dolan[®] and Lenzing Profilen[®] team welcome you to visit.
