

## **Dolan<sup>®</sup> and Lenzing Profilen<sup>®</sup>**

### **First combined presentation at the SUN show in Rimini**

The Lenzing AG brands **Dolan<sup>®</sup>**, a high quality acrylic fiber and **Lenzing Profilen<sup>®</sup>**, a high performance fiber for the most demanding sun shade applications, are joining forces with regard to innovation and marketing.

The first joint public appearance is at the SUN show in Rimini, the leading trade fair for architectural design, sunshades and the textile world. Dolan<sup>®</sup> and Lenzing Profilen<sup>®</sup> present the combination of high product quality, technical competence and design to an international audience.

Lenzing Profilen<sup>®</sup> is known world-wide as the high performance fiber for sun sails and sun shades with the best sun protection properties. Products made from Lenzing Profilen<sup>®</sup> have an excellent UV-resistance and are also dirt- and water-repellent. Thanks to its flexibility, flame-resistance and non-crease properties, Lenzing Profilen<sup>®</sup> is used mainly for textile architecture.

For more than 25 years, Dolan<sup>®</sup> has represented proven quality in the outdoor sector (awnings, sun shades, marine and garden furniture fabrics). The fiber is produced in Kelheim, southern Germany, using a special spin-dyeing process. It is therefore sought-after throughout the world because of its water-repellent, light-resistant and color-fast properties.

Dolan<sup>®</sup> is proud of being a sponsor of PoliDesign: young architects of the post-graduated course of PoliTecnico of Milan present at the SUN trade fair in Rimini their projects, where fabrics based on the solution dyed acrylic fiber Dolan<sup>®</sup> are used.

**LENZING PLASTICS – THE PLASTICS SEGMENT OF THE LENZING GROUP**

**Lenzing's Business Unit Filaments** belongs to the Plastics company of the Lenzing Group and produces synthetic filaments and fibers. This includes innovative products in the field of dental care, monofilaments, bristles and abrasives made from a range of synthetic polymers as well as acrylic fibers for outdoor textile applications and carbon fiber precursor manufacture.

**Lenzing's Business Unit Performance Products** is one of the world's leading producers of polyolefin and fluoropolymer products. Our main competence lies in the mono-axial stretching of polymers, a technology which allows the production of films and tapes with extremely high tensile strength.

**Lenzing Group:**

The Lenzing Group provides the global textile and nonwovens industry with high-quality cellulose fibers. Lenzing quality and Lenzing innovative power set standards for man-made cellulose fibers world-wide. Lenzing is committed to the principles of sustainable management and very high environmental standards. Lenzing's core business fibers and plastics are complemented by our activities in business field engineering.

**Key Figures Segment Plastics 2008:**

Sales: EUR 182.2 mill.

Export share: 85%

Total extrusion capacity: 40,000 tons

Staff: 950

**Key Figures Lenzing Group 2008:**

Sales: EUR 1.33 bill.

Export share: 88%

Fiber production: 540,300 tons
